

Know You Are Prepared When It Matters.

Clear Communication. Immediate Response.

Being heard is not enough. Your message must be understood. CAPSOL's® High Power Speaker Array, powered by Hyperspike's® advanced audio technology, delivers clear, intelligible messaging that cuts through ambient noise, not simply over it. Unlike traditional siren systems with audio capabilities, it is an advanced communication system designed to deliver both tones and voice messages.

Rapid Deployment. Flexible Communication.

The mobile CAPSOL® High Power Speaker Array can be deployed in minutes, providing immediate coverage wherever it is needed. Its maneuverable trailer allows for rapid relocation and operation, while advanced text-to-speech technology enables both pre-programmed announcements and on-the-fly custom messaging.

- **Advanced Technology** – Using Hyperspike's® advanced T CPA-Q speaker system, coverages of up to 1200m are easily achieved. Using 300W or 600W amplifiers, significantly less power is needed to provide clear audible messaging.
- **Extremely Flexible** – The system can consist of one trailer or many, depending on your specific needs.
- **Selective messaging** – Messages can be sent to one trailer for specific messaging or all for a complete notification system.
- **Live Voice** – A local microphone is available for live voice messaging.
- **System Monitoring** – System is continually monitored to make sure it is ready when needed.
- **Simple to operate** – Using the CAPSOL® dashboard, messages can be easily sent with minimal training.
- **Communication via radio** – Ethernet connection is an option, if desired.

WHO WE ARE: CAPSOL's focus since 2013 has been to develop systems to identify potential threats and provide early notification. The CAPSOLSuite is designed to gather, identify, and process data as early as possible to mitigate a threat. Notifying all affected people quickly and clearly makes lives safer.

Additional Specifications

System Configuration

System operates on local batteries for continuous operation with 120VAC connection available to maintain charge.

Available options include:

- Generator
- 200-watt Solar Panels

Complete Coverage

Can be integrated with other systems for complete coverage including:

- In-Building Notification
- Instant Mobile Alerting for Mobile Phone Notification
- MNSDrone™ for arial notification

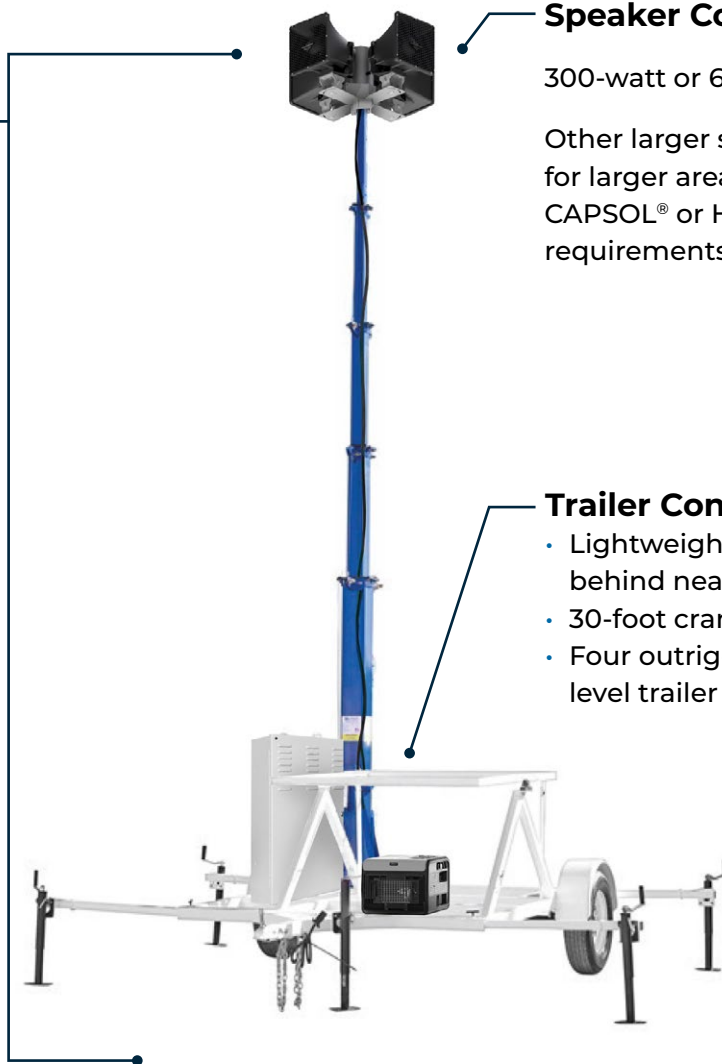

Speaker Configuration

300-watt or 600-watt TCPA-Q Array.

Other larger systems are available for larger areas. Please contact CAPSOL® or Hyperspike® with requirements.

Trailer Configuration

- Lightweight 2-wheel trailer pulls behind nearly any vehicle.
- 30-foot crank up mast standard
- Four outriggers to steady and level trailer

CAPSOL® brings your emergency communication systems together so you can reach people quickly and know you are prepared when it matters.
